

(Cane toads...we're just mates)

## Invasive species informational flyer

1. Access the Invasive Species Database at:  
<http://issg.appfa.auckland.ac.nz/database/species/search.asp?st=100ss&fr=1&sts=>
2. Choose one invasive species from the top 100 list.
3. Take notes on the following topics:
  - Scientific name (kingdom and species names written correctly):  
\_\_\_\_\_  
\_\_\_\_\_
  - Common name(s): \_\_\_\_\_
  - Describe the organism including diet, lifecycle, reproductive strategies, or other characteristics, which have made it successful.
  - What country is the species native to and what is its native habitat?
  - Into what other countries or areas has the species been introduced? What is its geographic range today?
  - How and why was the species introduced?
  - What native organisms have been impacted by this invasive species? Describe the affect this invasive species has on native organisms and the local economy.
  - How is this invasive species being controlled or managed at the present time?
4. Create an informational flyer about this organism using Microsoft Publisher. Include a picture of the invasive species from Google images. Cite all sources on the last page of the flier, using MLA format.
